# Class Interactions UML Diagram

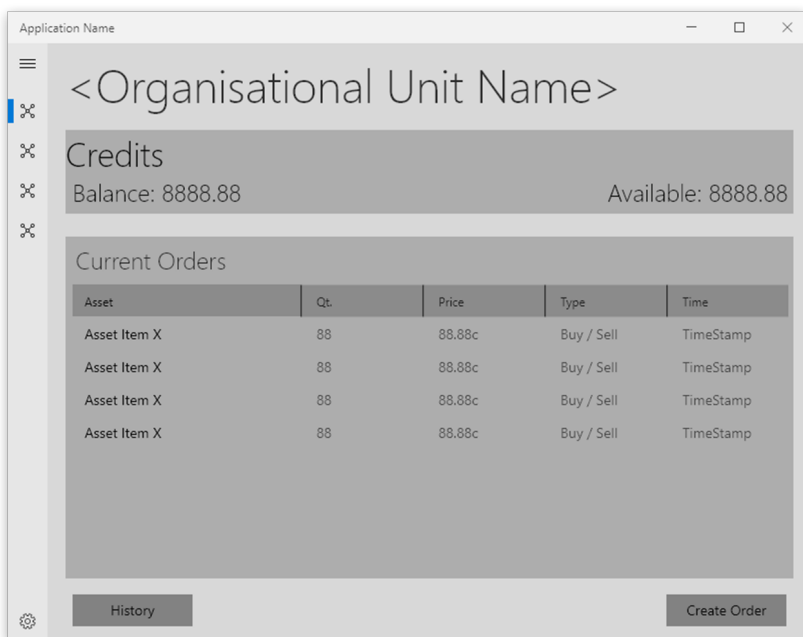

# GUI Design Forms

A screenshot of a login page within a window titled "Application Name". The page features a centered form with two input fields: "Email" and "Hint text". Below the "Email" field is a "Login" button. To the right of the "Login" button is a blue hyperlink labeled "Forgotten Password?".

## Login Page

This is an example of the Login Page. This is the first page the user is confronted with when starting the app. The structure is as it appears here, a centered form for the user to fill out. Upon successfully entering a valid user and password the user is navigated to Home page

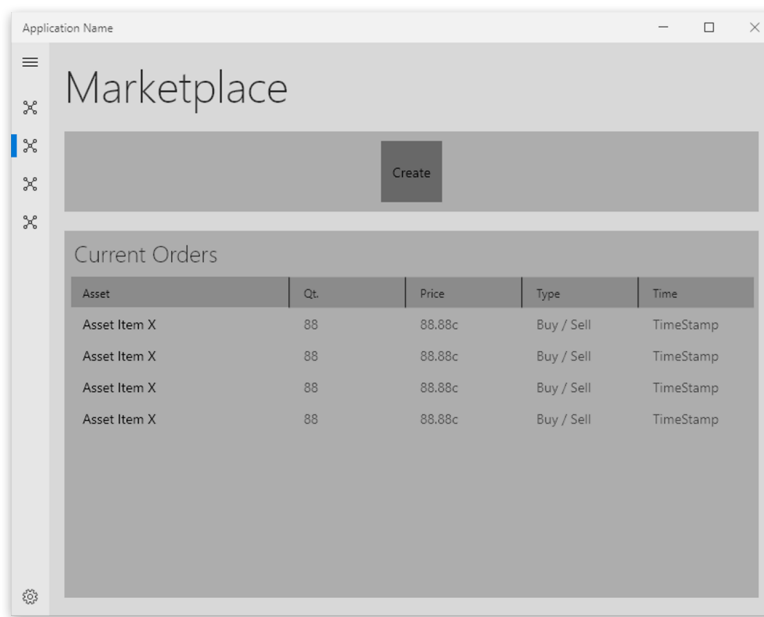

A screenshot of a home page within a window titled "Application Name". The page has a side navigation bar on the left with a hamburger menu icon and four icons. The main content area has a heading "<Organisational Unit Name>". Below the heading is a "Credits" section with "Balance: 8888.88" and "Available: 8888.88". Below the credits is a "Current Orders" section with a table. At the bottom of the page are two buttons: "History" and "Create Order".

Asset	Qt.	Price	Type	Time
Asset Item X	88	88.88c	Buy / Sell	TimeStamp
Asset Item X	88	88.88c	Buy / Sell	TimeStamp
Asset Item X	88	88.88c	Buy / Sell	TimeStamp
Asset Item X	88	88.88c	Buy / Sell	TimeStamp

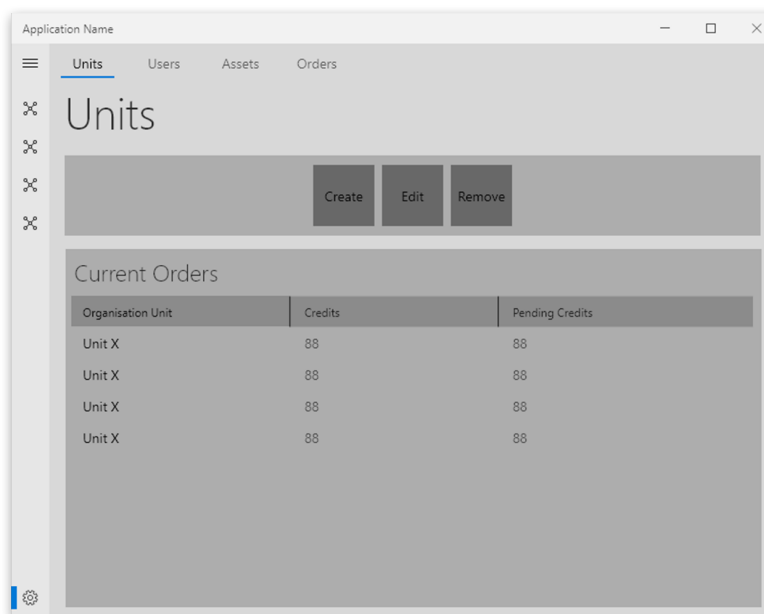

## Home Page

This is an example of the Home Page. This page is selected from the side navigation bar and is also the default starting page when a user logs in. The structure is as it appears there, a flow layout that contains a heading at the top with the unit's credits details below, with a table that displays the relevant data and controls to see the unit's transaction history or to create an order.

### Marketplace Page

This is an example of the Marketplace Page. This is selected from the side navigation bar. The structure is as it appears there, a flow layout that contains a heading at the top with controls below and table that displays the relevant data.

### Admin Page

This is the admin page, it is a tabbed pane that has different tabs the user can select. This page is navigated to via the navigation bar. This is an example of a tab with in the Admin page. Each tab's content will very depending on the use case but the structure is as apperiers here, a flow layout that contains a heading at the top, with controls at below that with a table that displays the relevant data. To edit or remove a element in the table

the user must select that element and then click one of the controls above the table. Upon doing that the user is given a User Input Form to use.

Create Order

## Create an Order

Selected list item

Availability  
<Qt.> Total Credits: 8888.88

Current Prices  
Min: <Price> Average: <Price> Max: <Price>

Your Price:  
Credits

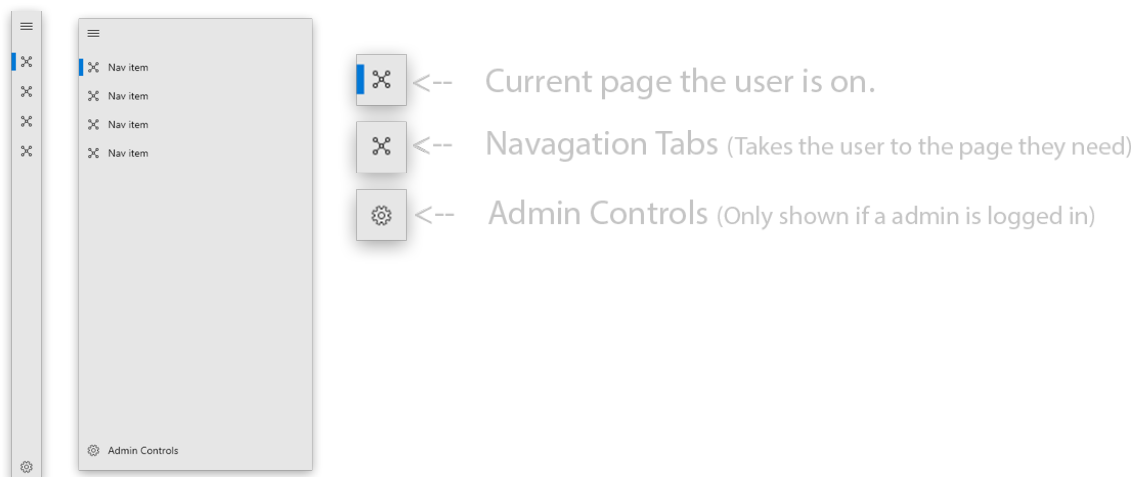

☒ Sell Order

Cancel Submit

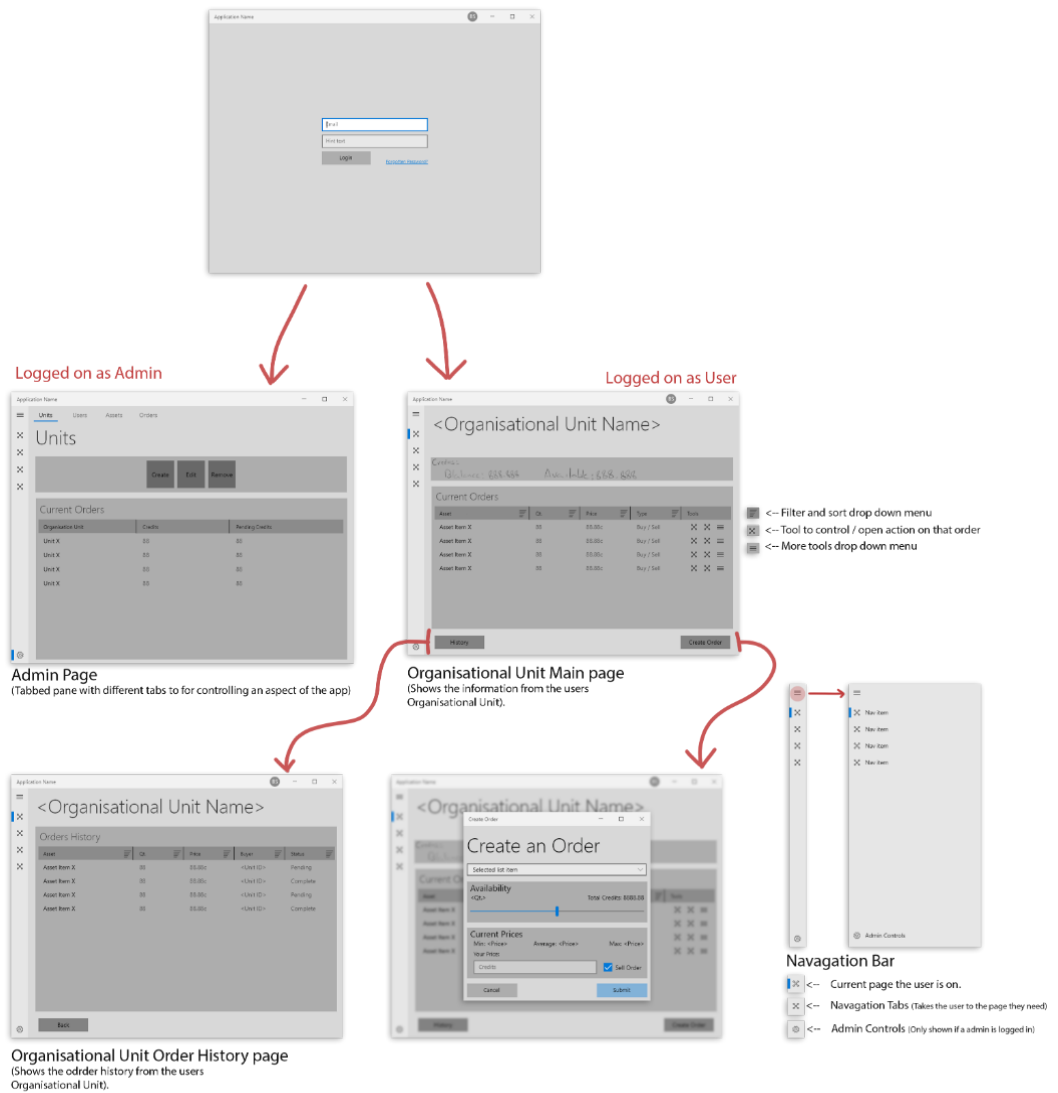

### User Input Forms

This is an example of a user input form. This frame appears over the top of the main application. Each form's content will vary depending on the use case but the structure is as it appears here, a flow layout that contains a heading at the top controls at the bottom with the form elements padding between these. Upon user successfully entering data into the form and hitting the submit button this frame will be disposed of and control returned to the main application.
